When attention to detail is an obsession

Uber-luxury homes now in Frazer Town

www.hmconstructions.com

HM Grandeur
Perfectly engineered homes

Who says engineering excellence is reserved for space ships?

Engineering excellence isn't the domain of space ships. Now, living spaces too are engineered and built like them; with great attention to details. Right down from the state-of-the-art smart building features to the magnificent Italian marble flooring and the teak outfitting. At HM Grandeur, you will find that every single component in the uber-luxury home is precisely engineered and built to exacting standards, just to bring you complete peace of mind. And a picture perfect home.

Why should you demand homes that are engineered to perfection?

A home is more than a home. It's a legacy that you leave behind for your children and grandchildren. So it's only natural that you demand nothing but the best. And HM Grandeur is exactly what you will be proud to leave behind. It's keeping this in mind we have designed the home with precision engineering and built it with extreme care. Like the inviting blue swimming pool to refresh you, an excellent gym and even a squash court to revitalize you. There's an exceptionally well designed fun zone too, just to keep the kids smiling. So you can be rest assured that your family can live in peace and luxury for a long, long time to come.

What can you expect from a precision designed and built home?

In HM Grandeur, the attention to detail almost borders on obsession. Every single component that goes into building the home, has been screened, tested and commissioned. Take for instance the supreme fusion of contemporary and classical architecture, or the magnificent 180° view from every wi-fi enabled condo. Everything speaks of exclusivity – from the meticulously designed bathrooms, Jacuzzi, Sauna or the opulent comforts of the recreational lounge. And these are just few instances that reveal our obsession for detail.

Where can you find an uber-luxury home in the heart of the city?

Frazer Town. That's right; HM Grandeur is bang in the middle of the city and yet has 82% of green space. And people who live there will vouch for the fact that it is one of the most habitable areas Bangalore has to offer. Almost anything you need is at arm's length – schools, hospitals, grocery shops, shopping malls, restaurants and the railway station – actually everything you need. Besides, Frazer still retains the charm of a military cantonment – broad tree-lined roads, ancient churches and quaint old homes from an era gone by. Making it a truly great place as a future enabled living space.
