

WELCOME TO HOMES WITH NATURAL LIGHTING

BRIGHTER HOMES. LIVELIER LIVES.

Have the sun rays wake you up every morning. And keep you company through your day.

Let the bright cheer of natural light touch every reach of your home, and reflect in everything you do.

Come make your home at Rohan Ishan.

It'll be a sunshiny day, everyday.

WELCOME NATURAL LIGHT

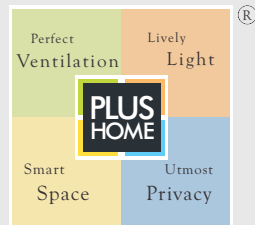

Pull your drapes aside, and throw the windows open. Sunlight will pour in right from the large windows in all the rooms. The way we've planned your home, absolutely nothing can stop the passage of light. We've done away with the unwanted walls and passages, making sure the light is unobstructed. And that you have a brighter home.

What's more surprising ? You'd expect an apartment complex of 126 apartments to block out natural light. But Rohan Ishan is very well lit because each window looks out onto open landscapes. And not other brick wall. Moreover, all the windows have been aligned to let in a steady stream of light.

We've ensured that for as long as you live here, you will never feel the need to use artificial light when the sun's still up.

MAKE SPACE FOR LIGHT: PLUS HOMES

Rohan Ishan, as many other projects of ours is inspired by a perfect blend of aesthetics & architecture, offering you everything, you have always wanted for your home. Aptly known as PLUS Homes, our home turns your basic requirement into our construction guide line.

Plus stand for perfect ventilation, lively lights, utmost privacy & smart space- a fresh design approach. Based on this unique concept Rohan Ishan provides natural well lit homes. We understand light does not reach 20 feet from any one source. So we have provided for more than one source of light in your home It is like looking at life in new light.

Another feature that sets Rohan Ishan apart is smart utilization of space. Dimensions of living room are in the proportion of 1:1.5 so that it does not look confined and narrow. Further, the number of passages are reduced, resulting in more living space. Overall – each one of them gets their share of space. At Rohan Ishan, we hold your personal space in high regard. A foyer at the entrance takes care of your visitors and makes sure that they don't walk straight into your living or dining area. Privacy is assured within your Rohan home because of proper placement of rooms. A placement that also allows cross – ventilation so that your apartment has enough fresh air. And light of course.

BE ONE WITH NATURE: ECO HOMES

We believe that life must exist alongside nature not at the cost of it. This is an ethos we call ECO Housing, We start out with the plan being designed in such a way that there is minimal alteration to the natural terrain. And we make sure that energy is conserved in every possible way.

Drip irrigation is utilized to prevent wastage of water while watering the landscape. To help improve depleting ground water levels, we utilize rain water harvesting, thus making use of every drop of water possible. The wet waste that is generated will be converted to compost in compost pit.

Across Rohan projects, fly ash a thermal waste is put to good use through a proven and scientific process. It is blended with concrete and concrete blocks in a precise proportion to enhance their properties. By acting as a mini biosphere, the natural landscaping plays a part in preserving the local eco systems. Thanks to the natural light and ventilation offered by our PLUS homes design, and the thermal roofing which helps keep the interiors cooler, less electricity is consumed, resulting in huge energy savings.

BE SAFE WITH: DIGITAL HOMES

Digital features in a Rohan home include a number of gadgets that make life truly futuristic. With these most modern features, you can control electronic appliances inside your house through your mobile phone, over the internet or with the help of a remote control. With the digital security features like security alarms you are completely secured from possible intrusion from any direction. The intelligent devices are always active to protect your home, while you peacefully sleep in the night or when you are away from your home. It also adds a lot of convenience in a world where time is premium. With digital technology, you can remain connected to your home from anywhere in the world to monitor safety and security. Like, if you are going on a trip and you aren't sure whether you turned off the gas, lights, or the geyser? You can do that over the Internet or even from your mobile. Of course, if you are not so forgetful, all you need to do is press a key while leaving, and the home will be put in locked mode, with lights, gas switched off and will also activate your security system. Control all lights of your home from a handy remote control. Pre-set the emergency pendant to your grandma. In case of emergency, she can just press the emergency button on the pendant and you will immediately receive an emergency alert on your phone and even to the security. In case there is fire or leakage of cylinders, or an intrusion inside your home, it will alarm the security and send an alert to you as well. You can also view images and clips of your visitors who come to visit you at your doorstep or security gate; locally or remotely, from anywhere using the Internet. The digital features also ensure you don't miss important events or functions in the society, all your memos will be flashed onto your intelligent LCD display. You can also set reminders. Who knows, you could use your system for online home shopping and perhaps explore many more exciting possibilities too. It's a digital world.
